## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 8 and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Kelly. Note plurality of driving stages (M1-M3) with control circuit (50) providing separate control signals through diodes (D11,D21,D31)

Claims 1-3, 8 and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Ward. Note plurality of driving stages (8a,8b) with control circuit (13) providing separate control signals and a sensor circuit connected through diodes (18a,18b) to the first conductor terminal and having resistor damping element (17b).

### ***Allowable Subject Matter***

Claims 4-7, 9-12 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 17-22 and 26-29 are allowed.

### ***Response to Arguments***

Applicant's arguments filed July 18, 2005 have been fully considered but they are not persuasive. The limitation of the driving stages being integrated in a single semiconductor body argued by applicants is not found in the claims. The claimed limitation is drawn to the control stages being integrated into a single semiconductor body.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
